Kinnective - K1

www.kinnective.co.uk

Our K1 course is a two day introduction to IASTM with the Kinnective Instrument.

Why Choose Kinnective?

- Designed by practitioners for maximum feedback and feel achieving fast and superior results
- The choice for elite UK sports - as used by England FA, England RFU, Royal Ballet, English Institute of Sport, Manchester City FC, Royal Yachting Association and many more!
- Taught & developed by the UK's most experienced IASTM practitioners

"Thanks for a great course at the weekend. My athletes already seem to be benefitting.."

Marcus

The Kinnective has been developed as a 3D, multi-use instrument with exceptional feedback and handling giving you the best results. The course has been put together by the 3 most experience practitioners in this field in the UK. Continually being developed the course is designed to produce competent and clinically aware practitioners who will gain the most from this technique.

If you are looking for an effective soft tissue technique with fast results that you can adapt to your clinical practice then this is the course for you.

What does K1 include?

K1 is designed to give you the ability to walk in to clinic the next day happy to utilise this fantastic soft tissue technique on any appropriate patient.

Hand Holds and Basic Use - Because the Kinnective Instrument is 3D and has many options for use, it is important to be comfortable with the application of basic strokes, grips and edges.

Whole body application - We cover all 4 quadrants of the body so that you are comfortable with the differing muscle types, tissues and contours by the end of K1

Hands on Experience! - We all know there is no substitute for this. K1 is predominantly practical divided into practical demonstrations with lots of hands on workshops. We keep our tutor-delegate ratio strictly limited to ensure you get appropriate one-on-one time too.

Get Results - Fast!

We have developed the "3 Rep Rule" which means that within 3 repetitions of motion to an area combined with Kinnective IASTM we expect results.

No mindless "scraping" or bruising inadvertently, this is a highly skilled, precise technique yielding the ability to be more specific than ever with application and results. Get the maximum effect with minimal intervention achieving the best results for you and your patient.

"Well taught and presented, good ratio of tutor to therapist" - [Richard Collinge, Cardiff City FC](#)

"Practical hands on element was majority of the day and interaction between instructor and course attendants was excellent" - [Adam Brown](#)

"I had a great day and I am absolutely loving IASTM!!! OMG had some brilliant responses already with notorious chronic conditions. Patient feedback is very positive! Let me know when the next course is." - [Anna](#)
